

CERTIFICATE OF SEGREGATION

Product Name: Soy Products non GMO (made from Soy Grits), production dates mentioned in the individual Certificates of each Batch.

This is to certify that the above mentioned products were manufactured from soy beans that have been planted, harvested, transported, stored and processed in fully segregated, ISO 9002 documented and verified system, which ensures full traceability.

We certify that the raw material has been managed within segregation of Non-GMO produce in full procedures from purchase of the soybeans to the production of final products. The above mentioned products were manufactured from non-genetically modified soybeans. The method of analysis used to verify that the soybeans used for the above were Non-GMO was a semi-quantitative PCR test.

**Analysis: RoundUp Ready (GMO) DNA
Results Less than 1% (level of Detection is 0,1%)
Max. Allowable: 1%
Method: Semi-quantitative PCR Test**

VEGETALIS certifies that the soy products fully correspond to the EC non-GMO (less than 1%) products.
